

Hot Weather Necessities

With winter past and the cold gone out of spring, you have begun to feel oppressed. Your winter home surroundings are too hot, and you naturally look about for relief. And here are two heat-reducing necessities:

Gasoline Stoves and Refrigerators

We handle the best improved vapor gasoline stoves—easily generated, safe, and fine cookers. They reduce heat to a minimum in the room, and give the maximum of results at the burners.

We are also showing well made and tight refrigerators—an ornament as well as a necessity. Remember these things.

Harness

LEMON FOR ROOSEVELT

Large and Juicy One Handed Out by the Switchmen's Union.

Detroit, Mich., May 23.—The biennial convention of the Switchmen's Union of North America adopted a resolution against the "kidnaping" of Moyer, Haywood and Pettibone and requesting President Roosevelt to use all legitimate means in his power to secure a reversal of the recent decision "legalizing the kidnaping." The resolution was adopted unanimously by the 250 delegates who are present from every state in the union, representing a membership of 23,000.

The resolution declares that "all laws relative to the protection and liberty of all American citizens in procuring defense were denied these brothers by the governors of Colorado and Idaho," and that their removal to the scene of the kidnaping was a "pure and simple case of kidnapping."

The resolution continues: "And, whereas, President Roosevelt has seen fit to use the public press in expressing sentiments against Moyer, Haywood and Pettibone were 'undesirable citizens' and previously referred to the Western Federation of Miners' officials as having been implicated in the murder; and

Whereas, such statements stand without precedent in the civilized world; and

"Whereas, we believe said statements will affect these brothers in jail in Idaho, condemning them before trial; be it

Resolved, That the Switchmen's Union of North America, in convention assembled, denounces the series of outrages instituted against these brothers, believing it a serious blow to American citizenship and good government; be it further

Resolved, That a copy of these resolutions be forwarded to the governors of Idaho and Colorado and to Moyer, Haywood and Pettibone. The resolution was also adopted to urge every member of the organization to become active in politics and to work for men who favor measures beneficial to himself, regardless of party.

MCCORMICK FOR REEDER'S JOB

Sixth District Democrats Grooming the Phillipsburg Man.

Harry Root, in his Sixth district notes, has felt of the democratic pulse, and gives out the following prognosis of the case:

"The democrats of the Sixth district are on the alert for a candidate to snuff victory in 1938. Ex-Congressman N. B. McCormick of Phillips county may get like other congressional races. At least a representation of democrats from Sherman, Thomas, Graham and Rawlins counties met some time ago to discuss the case of the democrats of Phillips county. In Phillipsburg, and the question of how a democrat can beat Congressmen Root and McCormick was the main thing. McCormick was the man who can do it, these representatives democrats believe. Since his defeat for a second term he has kept out of politics, attended strictly to law, and built up a fine practice, in fact he is making more money than he can get out of the salary of a congressman. The democrats seem to have trouble ahead for the machine and square deal factions of republicans, and a political tidal wave will engulf these factions in 1938, and in this event a democrat will succeed the republican, and his name is likely to be McCormick."

Eva Booth's Policeman.

"You are under arrest!" You are disturbing the peace," snarled a policeman, breaking off her first public paper in the streets of London. She was still in the early stages of the fight of a girl with no means of resistance, and as the bullying officer tightened his grip on her, she was dragged shrieking with him.

But the action aroused the sympathies of the rough crowd as a light match fires a keg of gunpowder. In an instant the policeman and his prisoner were surrounded, and before the officer could make a move, he was beaten to the pavement under a shower of fists.

It was the first prisoner who, forgetting his rough trip and the cell to which he would have dragged her, appealed to the throng in his defense. When the crowd finally retreated, the policeman was groaning with two broken legs and a mass of bruises from head to foot.

For weeks the little girl in the big Army bonnet paid faithful visits to the helpless man in the hospital, and when he was released, the former friend Eva Booth and her cause could not have found in all England. To this day she receives letters in a rough, sprawling hand signed simply, "Your policeman."—Hugh C. Weil, in the World Today, for May.

His Idea of a Good Time.

From June Bohemian.

The retired contractor sighed as he sat into his dress suit and thought of the elaborate dinner and the opera that were to come.

"Some day," he said, "I'll not rest myself, and then do you know what I'll do?"

"Something terrible, no doubt," replied his ambitious wife.

"I suppose it wouldn't look well in print," he admitted, "but I can't help that. What I'll do will be to throw away these high priced cigars, put on some old clothes, go out at one o'clock by the back way and smoke a quarter pound of cutup chewin' tobacco in a cob pipe while I'm takin' things over with the coachman in the bays."

Wonderful Ecstasy Cure.

"Our little boy had ecstasies for five years," writes N. A. Adams, Henrietta, Pa. "Two of our home doctors said the case was hopeless, his lungs being affected. We then employed other doctors, but no benefit resulted. By chance we read about Ecstasy Bitters, bought a bottle and soon noticed improvement. We continued this medicine until several bottles were used when our boy was completely cured. Best of all blood medicines and body building health tonic. Guaranteed at A. A. Stevenson's drug store, 31c."

TRAINS TO RUN SLOWER.

The Time From Chicago West Lengthened by Agreement.

Chicago, May 23.—After discussing the question several weeks, the western railroads have reached an agreement to lengthen the schedule of their through passenger trains. All to effect June 9 by which the minimum time of passenger trains between here and Omaha will be fourteen hours and thirty minutes, which is two hours more than the running time now of the fastest trains to Omaha. The minimum time between Chicago and Kansas City will also be lengthened by two hours and thirty minutes. The average running time now of the fastest trains is thirteen hours and thirty minutes. The minimum time of passenger trains between here and Denver, now twenty-seven hours and thirty minutes, will be thirty-two hours after June 8.

The great stumbling block encountered by the railway officials in trying to reach an agreement for the lengthening of schedules has been the minimum time of passenger trains between St. Louis and Denver. This has been settled by adopting a minimum standard of thirty-two hours, which is one hour more than the present schedule of the Chicago, Burlington & Quincy's fastest trains between St. Louis and Denver.

The only schedules to be adjusted are between Chicago and San Francisco. It is probable that they will be lengthened at least four hours. The western railway officials assert that the present schedules are safe, but are not for economical operation.

EXPRESS COMPANIES QUIT.

Discontinues the C. O. D. Whiskey Packages in Kansas.

The Wells Fargo Express company has given notice that no more C. O. D. liquor shipments will be received for Kansas at the new express company station in a great many places for years past has been nothing less than a common and most annoying liquor was handled on the C. O. D. plan, those distributing it being a "bottle" business who were not able to pay for a box or jug of liquor only as they gathered up the amount among their associates.

The condition became so unbearable that a number of depots in the state have been raided by the officials in charge. In some places \$300 or \$400 worth of liquors were secured in this way and taken to the depot where made at Syracuse and at Meade.

The attitude of the Kansas people toward this kind of business has had its effect upon the Wells Fargo company and they have delivered the above order, to receive no more C. O. D. shipments for this state or Kansas after June 1. It is expected that other express companies doing business in the state will give like orders and that this form of violation of the prohibitory law will no longer trouble the people of our state.

Some of the people who took upon the movement as a voluntary act upon the part of the express companies, and it is a common thing to find out whether it is a violation of law or not. The recent decision rendered by the supreme court of the United States covering that point holding that the sale is made where the money is paid over. It is this true the handling of C. O. D. shipments and receiving the money for them would be a direct violation of the law.

ECHOES OF BEECHER.

Nemesis of the Great Preacher, Theodore Tilton, Dead in Paris.

Paris, May 25.—Theodore Tilton died in this city this afternoon. He had been unconscious for hours before he passed away.

Mr. Tilton's last illness was very brief. Wednesday he took his customary walk, and when he returned he mounted the five flights of stairs to a common room at the Hotel Fuller where he resided; he then complained of fatigue and went to bed. A physician diagnosed his illness as pneumonia.

No definite arrangements regarding the funeral have yet been made, except that the service will be held Monday in the American church. Mr. Tilton's children in America will be shipped to the United States.

Theodore Tilton, author and journalist, died in New York in 1918. He was successively editor of the Independent, the Golden Age and the Brooklyn Union. In 1874 Mr. Tilton used Henry Ward Beecher for \$100,000 damages for alienation of Mrs. Tilton's affections. The trial lasted 112 days and resulted in a disagreement. Mr. Tilton lived in Paris since 1883. For some days past he had been suffering from double pneumonia complicated with heart trouble.

New York, May 25.—The body of Theodore Tilton probably will be buried in Paris. Mrs. Tilton, one of his daughters, when informed of her father's death, it is not contemplated to bring the body to this country. She also said that it would be impossible for her to go to Paris to attend the funeral, as it is unlikely that her sister or any other of Mr. Tilton's relatives now here would be able to go.

SAYS GULF STREAM HAS MOVED.

Cold Weather in Scotland Accounted for by a Sea Captain.

New York, May 23.—Captain J. L. Lunt, of the Anchor Line, who has been in Scotland for some time, has found a reason for the cold weather. He says the Gulf stream, which ordinarily has a range between 46 and 55 degrees north latitude, is away to the north, and he found for the Atlantic a high barometer and a southerly wind, which is very unusual.

"I don't say the Gulf stream is out of its margin," said the captain, "but it is to the northward of its usual course. This accounts for our winter weather here in Scotland, where we have been having snow every other day. We don't have the seasons we used to have."

Couldn't Go the Payee.

JAPS NOT A MENACE

Missionary Says the Talk About the Japanese is a Myth.

Denver, Colo., May 23.—Miss Olive M. Blunt, a Denver visitor, who for years has labored as a missionary in the Orient, believes the menace that the Japanese intend is a myth. She said:

"As a class of people the Japanese should be encouraged to come to America. The conscientiousness, which forms one of the strong characteristics in the life of the better class of Japs—America is something that will benefit any community. It will help to strengthen American character."

"Since coming to Denver only a few days ago I have seen many men have asked me to secure them good Japs. They recognize that Japanese civilization is almost perfect. They want to learn American ideas with the view of some day returning to the land which they all love and there help to elevate the standard of their own land."

Miss Blunt addressed a congregation of about 100 Japanese, Chinese and Koreans last night at Central Presbyterian church.

A Pica for a Nobler Manhood and a Higher Civilization.

About two years ago I came into the Sherman county community, a stranger. I was favorably impressed with the people and locality, in short, made up my mind that I would be pleased to become permanently interested in the county. I felt justified in saying I never met a larger proportion of whole souled, true and progressive people in any locality I ever became acquainted in. I met with uniform good cheer for the most part, but unfortunately a few men pushed themselves into business relations with me that are to say the least, very questionable in their methods, but to do justice to the better element, which is the majority, I was well cautioned about these characters.

"The gods would destroy them first make mad." It may be that I will have occasion to speak more plainly of certain characters, unfortunately from a financial standpoint, but fortunate that their actions furnished me the stimulus to arouse an undying antagonism to wrong and wrong-doers.

I did not intend for a while at least to make myself conspicuous, but on account of the commotion and misrepresentation of the irresponsible parties, I will pursue a bold, candid and fearless course and give the public every opportunity to know the facts, and, if I am found guilty, after a fair hearing I will, if I have the power, make the amende honorable.

I never have a business disagreement with any person that I am not willing to leave to the courts, and if the decision is against me, I will pay the damages. It is my intention to do this.

I would not, at this time, trouble the citizens with this article, but as I have anticipated having something to do with the public in the future, it is necessary that you know me thoroughly. Having those things in view some time ago, I put some things in the local papers which I meant then and now will put some of them into practice.

I expect to be harshly criticized and antagonized by every disreputable citizen who come in contact with this article. I am confident that the good will support of all well-meaning, intelligent people. It is a lamentable fact that the principles of honesty, progress and forward to the best citizens.

The world now needs men, more to expose the selfish, untruthful and dishonest, than most anything else. If every good citizen should make himself a terror to the disreputable, would soon have a better community.

This is but the beginning of something that may be of interest to the country in general. When the proper time comes you will hear from me in no uncertain tones; then you will understand my motive in writing this article. I firmly believe that every person must sooner or later know what they say, hence if I am wrong I want to know it, for only a fool wants to remain in error. I cannot teach, I can learn, consequently I invite criticism.

I repeat, be charitable to the person who does wrong for lack of intelligence or ability, but strong in your commendation of willful dishonesty and untruthfulness. Do not require courage, candor and capacity. Never compromise a conviction, surrender a principle, or give in to a bribe. "Heur to the line, let the chips fall where they may."

Do your duty and let results take care of themselves. Fear nothing only to do wrong; acknowledge no master but your highest convictions of right; reason and resist; and finally apply to all things; for the plane of reason is the field upon which the conflict of all opinions must sooner or later be fought.

I know of no domain in nature too sacred for the profoundest honest man to explore in search of truth. I am endeavoring to pass beyond the stage of fear or influence of superstition. We could make a paradise of this world for a great deal less than it costs to make a hell of it—only by honesty, honesty and honesty prevent us.

We expect a criticism hereafter on the religious, moral and political systems, and the appeal will be made more especially to the religious element for a better system, as that body contains the largest proportion of people with the strongest and best convictions.

In view of the conflict that is coming, and is near at hand, let us stir on the armor of courage and candor. Let every man consider himself as a committee of one to expose and oppose the wrong and defend the right. Let us endeavor to prevent the operation and improvement of the mind, and a higher and grander civilization and manhood will soon be established.

More anon. Respectfully yours, HUGH DYATT.

Another to Myrtilla.

Alas! no more may poets sing—About that dainty, golden string. The garter of Myrtilla. For newdays all that's passe, And managers of the past, The garter of Myrtilla.

The modern maiden up-to-date Has struts and bucks at least eight To keep her figure slender. So minor poets now may write A sonnet new, and in the end, "To Myrtilla's straight front suspender."

—Puck.

\$100 Reward, \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known for the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the system, thereby destroying the foundation of the disease, giving the system a new basis of building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.
